PROFESSIONAL EXPERIENCE

NET . O R A N G E

Lead UI/UX Architect and Software Designer

March 12, 2012 – Present

5000 Quorum Drive Suite 400 Dallas, TX 75254

(972) 550-0568

Working on the company's patented clinical Operating System (cOST™) that leverages existing legacy systems, such as electronic medical records (EMR), health information exchanges (HIE) and claims, in real-time. The software is designed to allow hospitals, physician practices, hospital administrators and insurance, (even Medicare, Medicaid) institutions to work together and thrive in a value-driven accountable healthcare environment, regardless of the payment model. cOS-powered applications provide predictive analytics and care coordination workflows for all stakeholders in the care continuum including physicians and their staff, hospital administrators, community care providers, disease and wellness management coaches, health plan administrators, patients and their caregivers. Immediate benefits include reduced readmissions and a significantly enhanced visibility into real-time constraints such as personnel and facilities, and to the success/risk factors for profitably participating in value-based purchasing and bundled payment (ACO) models.

Application Development:

- Population Health Management
- Quality Scoring and Meaningful Use
- Enterprise Health Records
- Revenue Cycle Management
- Extended Data Repository (XDR)
- Enterprise Health Records
- Clinical Trial Management

Currently I work directly under the CXO as the experience designer and architect gathering requirements and making sure that the customer's needs are met and the application makes their jobs easier. The application is already in use and is co-branded in hospitals in the US and Canada.

PERFICIENT INC .

Lead UI/UX Architect: UI Designer, UX Interaction Developer, Creative Consultant & QA Analyst

August 23, 2010 – March 12, 2012

5465 Legacy Drive Plano, TX 75024-3106

(972) 212-8900

Consulting on multiple engagements as a part of the National User Experience Practice. In my role as a consultant I get to determine new web strategies, build and participate in the User Experience Design space as an expert who has been a consultant on many fortune 100 client web applications. Design, implement and build applications all over the US as a part of the National User Experience Practice. Roles as a Lead UX Architect include; UX Designer, Information Architect, User Experience Designer, Engagement Manager, and UX Developer. Manage large teams made up of UX Designers, Developers and Information Architects. Also work hands on building design mockups, prototypes, user test cases, do user testing, all while delivering workflows, wireframes, specifications, high and low fidelity comps, and code (when required).

Advanced Auto Parts: (Lead UX Architect & Engagement Manager) Interface with the Business Owners doing analysis, design, and enhancements for the "Find It Fast" application slated to replace their existing Point of Sales Application in over 300 stores, which is intended to also serve as kiosk in stores and eventually be online. I am leading a team of over 100 resources consisting of UX Designers, Developers, DBAs, Business Analysts, and mixed resources from Perficient, AAP, and other agencies. Also the Engagement Manager - managing the resources on site that are working to redesign the company intranet, and extranet resources.

- AdvancedAutoParts.com - Major Car Parts Distributor and Retailer
- Find It Fast – Point of Sales Store Application Replacement
- Corporate Intranet

Dell/Integrigy: (Lead UX Architect) Participated in analysis, design, and enhancements for a business to business application cross selling other companies products alongside theirs for computers, laptop and other hardware manufactured by dell. Designed and tested high-fidelity wireframes of the application for Business Owners to use in sales pitches and User Testing. Also conducted a training class in Axure to get developers, designers, and Business Analysts up to speed to start prototyping the application and capturing the requirements in one location.

- Integrigy.com - Major Computer Wholesaler and Retailer

Lenovo: (Lead UX Designer) Participated in a 7 person team doing analysis, design, enhancements and testing of a customer facing and call center application to troubleshoot and provide warranty parts replacement for computers, laptop and other hardware. Delivered the final high fidelity mockups and participated in the wire framing and requirement gathering.

- Lenovo.com - Major Computer Wholesaler and Retailer

First Data Corporation: (Lead UX Architect) Participated in a team doing analysis, redesign, enhancements and testing of a customer facing and call center applications to troubleshoot and determine the best way to approach uniting all their internal one off applications built for credit card processing. Participated in User Testing and Data Analysis.

- FirstData.com - Major Credit Card Processing Company

DEED - Career One Stop: (Lead UX Architect) Participated in functional wire framing of the Reemployment section of the CareerOneStop.com/Reemployment Website for Unemployed people reaching the end of their benefits. This was a project commissioned last minute by the White House to address the needs of users losing their Unemployment Benefits (referred to as 96'ers), that would need more help finding jobs and other benefits. Banners on Benefits.gov and other government agency websites would be pointed and redirected to this site for information. I was told that even the Secretary of State reviewed the section we created and gave us kudos! It was a very short lead time, 2 weeks, from conception to completion.

- CareerOneStop.com/ReEmployment - DEED White House Initiative

Fossil: (Lead UX Architect & Engagement Manager) Act as the UI Lead for a team of internal and internal (Fossil) and external (Perficient) resources for the new WatchStation.com website where all the Brands Fossil makes will be sold and marketed on one site. The website works with the individual brands to create a unique branded micro site as well as sell their products in line with all of the other brands Fossil distributes, giving them micro sites and individually designed areas of the website that are branded individually to give each brand a presence. I also worked to gather and create all the documentation for their Fossil branded site to be internationalized in any language or region.

- [Fossil.com](#) – Managed and collaborated with a mixed team of Perficient and Fossil; Designers, Developers, Managers, Team Leaders and Fossil Stakeholders to convert the existing Fossil web application onto a new Customized Open Source Java “Asset Store”. Thus allowing the site to be utilized in whole and part for implantation into other languages and re-skinned to be used for a mix of Fossil “in-house branded” websites like Relic, Diesel, Zodiac and Stark.
- [Fossil.jp](#) - Japanese version of the Fossil Branded website
- [DieselTimeframes.de](#) – English, German, and Italian version of the Diesel.com website flipped onto the Asset Store Open Source Java CMS
- [WatchStation.com](#) - Website (in the Asset Store) with a lot of new and added Portlets that will make this “The Watch Domination” website! Fossil also purchased the chain of Watch Station Stores to sell all the in-house brands Fossil makes like DKNY, Michael Kors, Armani, Diesel, Stark, Zodiac, Addidas and more.

R C G I T

UI/UX Designer & Architect, Sitecore Developer February 16, 2010 – August 20, 2010
 3900 N. Dallas Parkway, Suite 150 Plano, TX 75093 (972) 244-6250
 Contracting for Boy Scouts of America National Headquarters to rebrand their national website, work on new web strategies, and reorganize their intranet and council operations websites that are internal to the organization. Design, implement and build applications within their Site Core and SharePoint Environment. Roles include Information Architect, User Interface Designer, and User Experience Designer; building design mockups, prototypes, user test cases, workflows and wireframes:

Boy Scouts of America: Responsible for contributing and helping design/update the National Boy Scouts website while designing and implementing prototypes into the live Sitecore CMS environment. Providing various Workflows and Wireframes for demonstration and planning purposes. I am also doing the actual implementation of those designs within Sitecore for both the intranet, corporate and other external facing websites.

COLLABERA

Senior UI Consultant at Blue Cross Blue Shield of Texas August 2009 – December 31, 2009
 1707 Market Place Blvd. Suite 280 Irving, TX 75063 (214) 687-0700
 Consulting for Blue Cross Blue Shield of Texas. Application design and implementation for BCBS sales. The EPP application was being built to compile all of the elected benefits and the individual employee's enrollment information into one tool that could accurately forecast what a large fortune 100 company would pay for benefits for their employees. As a consultant I worked directly with the Business Owners (High level Management in charge of the overall application decisions) to design, implement and build interlocking applications within their Java Environment utilizing RAD7 and CVS code repositories in their development environments. Roles included; Information Architect, User Interface Designer, and Lead User Interface Designer. Activities: HTML/CSS generation, Java development, building design mockups, prototypes, user test cases, and wireframes.

Blue Cross Blue Shield: Responsible for designing and implementing html prototypes into the live Java Development environment. Coded Flash reporting tools for management reports on utilization of the website and how much money was sitting in queue to be processed or lost. I also worked on the intranet building various Flash movies for demonstration and training purposes.

- [BCBSx.com](#) – Corporate Web Application
- [EPP](#) – Enterprise Portal Application
- [BA](#) – Business Acquisitions Application
- [NDC Dashboard](#) – Flash Sales Monitoring Tool

FAITH WARREN GROUP
